TITLE	Fall 1987 Minnesota Post-Secondary Education Enrollment Survey. Basic Data Series Report Number 16.
INSTITUTION	Minnesota Higher Education Coordinating Board, St. Paul.
PUB DATE	Jun 88
NOTE	561p.
AVAILABLE FROM	Higher Education Coordinating Board, 550 Cedar Street, St. Paul, Minnesota 55101.
PUB TYPE	Statistical Data (110)
EDRS PRICE	MF02/PC23 Plus Postage.
DESCRIPTORS	Access to Education; College Attendance; College Freshmen; *Educational Demand; *Enrollment; Enrollment Influences; *Enrollment Trends; Full Time Students; Higher Education; Part Time Students; Private Colleges; Sex; State Colleges; State Surveys; State Universities; Technical Institutes; Two Year Colleges
IDENTIFIERS	*Minnesota

ABSTRACT

The Minnesota Higher Education Coordinating Board annually publishes a report of enrollments in Minnesota post-secondary education. The enrollment data presented here were provided by Minnesota public and private postsecondary education institutions in fall 1987. The 1987 enrollments are compared to the preceding four years. This annual report, the fifth one to be generated from the student record database, contains the following five sections: (1) fall 1987 headcount enrollments with a 5-year summary of total headcount, of full- and part-time enrollment, of male and female enrollment, and of new entering freshmen; (2) fall 1987 institution enrollment reports; (3) full-year equivalent enrollments and average daily memberships and a 5-year summary of full-year equivalent enrollment and average daily membership enrollment; (4) enrollment by county of residence report by system; and (5) new entering freshmen participation ratios to high school graduating seniors. For each section, the state university system, community college system, technical institutes, University of Minnesota, private vocational schools, private two-year colleges, private four-year colleges, private professional schools, and state totals are considered. FALL 1987 MINNESOTA POST-SECONDARY EDUCATION ENROLLMENT SURVEY

Prepared by the Staff of the

Minnesota Higher Education Coordinating Board

June 1988

PREFACE

The Minnesota Higher Education Coordinating Board annually publishes a report of enrollments in Minnesota post-secondary education. Data contained in this report are used by educational planners, policy-makers, and the public for descriptive and research purposes.

The enrollment data presented here were provided by Minnesota public and private post-secondary education institutions in fall 1987. 1987 enrollments are compared to the preceding four years.

This annual report is the fifth one to be generated from the student record data base. The Minnesota Higher Education Coordinating Board converted to a student record data base in fall 1983. Previously institutions provided aggregate data to a survey form; now, institutions provide unit records for each student enrolled in their institution.

This report contains five sections: (1) Fall 1987 Headcount Enrollments, (2) Fall 1987 Institution Enrollment Reports, (3) Full-Year Equivalent Enrollments and Average Daily Memberships, (4) Enrollment by County of Residence, and (5) New Entering Freshman Ratios to High School Graduating Seniors.

The unit records for all collegiate institutions reflect enrollments as of the tenth day of classes for fall term 1987. In order to improve comparability of data between institutions, private noncollegiate institutions and the technical institutes reflect enrollments for a three-month period in the fall.

Tenth day enrollment figures have been used to maintain continuity with historical data. Tenth day doesn't necessarily reflect total enrollment. Some students may register after the tenth day of classes.

The full-year equivalent enrollment information is based on credit hours of instruction generated on-campus during fall through spring of the academic year in off-campus or extension courses, and during summer session. Average daily memberships for the technical institutes are for the fiscal year.

The county of residence and new entering freshman ratio sections contain data for each system and for the state. The microfiche packet attached to the back cover contains county of residence and new entering freshman ratio data for individual institutions.

Some data on the unit record level are not available. If a table displays students classified by two data elements, such as sex and level, a student cannot be tabulated when one of the two elements is missing. Footnotes state how many students were not tabulated due to missing information.

Due to the nature of the individual student records, the data presented in this report, although somewhat less complete, are considerably more accurate than data collected prior to fall 1983. Institutions also are using uniform definitions for data elements such as full-time/part-time. Although this will improve comparability across institutions, it may initially lead to inconsistencies in historical comparisons.

Statistics in this report may differ slightly from those submitted by the institutions. For students who were enrolled in different institutions simultaneously, complementary data may have been obtained from both institutions.

PART 1. FALL 1987 HEADCOUNT ENROLLMENT

Part 1 contains five-year summaries of regular (on-campus) headcount enrollment data for Minnesota post-secondary education institutions arranged by system. However, off-campus headcount for community colleges is included in regular enrollments. State enrollment totals are presented at the end of each report. Students enrolled in off-campus or continuing education and extension programs, other than the community colleges, are not included in the five-year summaries.

A Five-Year Summary of Total Headcount reports total headcount enrollment for regular students as of the tenth day of classes for fall terms 1983 through 1987. For technical institutes, the headcount reported is for the quarter ending October 1. The percent change columns compare fall 1987 enrollment with fall 1983 and fall 1986.

A Five-Year Summary of Full-Time and Part-Time Enrollment shows the full-time/part-time distribution of total regular headcount. The table also displays each institution's full-time/part-time ratios for 1983 and 1987. In the past, each institution used its own definition of full time and part time. Beginning in fall 1983 all institutions are using the same definitions. A full-time student is one whose course load or other required activity is at least 75 percent of the normal full-time load as defined by the institution. A part-time student is one whose course load or other required activity is less than 75 percent of the normal full-time load as defined by the institution.

A Five-Year Summary of Male and Female Enrollment summarizes for each institution the distribution of total regular headcount by sex and shows the 1983 and 1987 male/female ratios.

A Five-Year Summary of Total New Entering Freshmen presents total regular new entering students at each institution for each fall 1983 through 1987. New entering students are those who previously have not attended a post-secondary institution. The percent changes in number of new entering freshmen from 1986 to 1987 and from 1983 to 1987 are displayed.

There was a significant increase in reporting of private vocational enrollments starting in fall 1983. This increase is evident in state totals. It reflects an increase in reporting but does not necessarily indicate an increase in actual enrollment.

PART 2. INSTITUTION ENROLLMENT REPORTS, FALL 1987

Institution Enrollment Reports summarize for each institution the number of students enrolled by level of study, sex, and attendance status (full-time or part-time). Enrollments are shown for regular (on-campus) offerings and for collegiate and vocational programs.

Extension enrollment data are generally not available by the tenth day of the fall term.

PART 3. FULL-YEAR EQUIVALENT ENROLLMENT AND AVERAGE DAILY MEMBERSHIP

The **Academic and Fiscal Year 1986-87 Full-Year Equivalent Enrollment and Average Daily Membership** tables display enrollments by level for academic year 1986-87 for collegiate institutions and for fiscal year 1987 (July 1, 1986 through June 30, 1987) for vocational institutions.

For public collegiate institutions, the following tables show full-year equivalent (FYE) enrollment for the regular academic year for on-campus and off-campus or extension programs. Each public system of post-secondary education calculates its summer session FYE enrollment using a different formula, resulting in incomparable data. Therefore, for summer session, this report shows student credit hours rather than FYE data. For the Community College and State University systems, the reported summer sessions precede the academic year. For the University of Minnesota, data are for the summer session following the academic year.

Average daily memberships (ADM) are shown for the public technical institutes (TIs). For private institutions, the data displayed are for the regular academic year, on-campus. The private colleges have few extension students, and summer session FYE data are not available.

Full-year equivalent enrollment counts result from dividing the total number of credit hours generated in a given year by the normal full-time credit hour load at an institution. In most cases, credit counts are the totals generated at the end of the terms and do not include withdrawals. End-of-term data were not available for several private institutions, which provided instead the total tenth day credits for all terms.

For technical institutes, average daily memberships are based on clock hours of instruction. One ADM receives 1,050 hours of instruction.

Full-year equivalent enrollment data for private vocational schools are not available.

A Five-Year Summary of Full-Year Equivalent Enrollment and Average Daily Memberships displays for academic years 1982-83 through 1986-87 full-year equivalent enrollments at collegiate institutions and average daily memberships at technical institutes for fiscal years 1983 through 1987. On-campus, off-campus or extension, and summer session enrollments are displayed for all public collegiate institutions. Enrollment in extension for credit courses at the private colleges is negligible and, therefore, not shown. Summer session enrollment data for private institutions are not available.

*Academic years 1983-84, 1984-85, and 1985-86 FYE figures are not comparable with previous years. The reports for these years included courses offered through summer session and extension that are attributable to regular instruction. In previous reports, not all of these courses were included in regular instruction. Because of this change in reporting, figures showing percent change over five years are inapplicable and have been omitted.

Total	129,246	154,726	150,849	153,010	154,155	0.7

*Academic years 1983-84, 1984-85, and 1985-86 figures are not comparable with previous years. The reports for these years included all credit hours taught in summer session. Previous reports did not include regular credits taught through summer session that were attributable to regular instruction. Because of this change in reporting, figures showing percent change over five years are inapplicable and have been omitted.

N.W. Chiropractic	462	483	470	496	542	9.3	17.3
St. Paul Seminary*	83	76	78	75	97	29.3	16.9
United Theological Seminary	152	149	124	122	105	-13.9	-30.9
Wm. Mitchell College of Law**				1,109	1,091	-1.6	
Total	1,871	1,859	1,761	2,898	2,933	1.2	56.8

*St. Paul Seminary's increase in FYE reflects the Seminary's merger with the religious programs at the College of St. Thomas.

**William Mitchell College of Law did not provide FYE figures for 1983-1985.

PART 4. FALL 1987 COUNTY OF RESIDENCE REPORT BY SYSTEM

The **County of Residence Report by System** contains system and state aggregations of institutional data collected in fall 1987. For Minnesota new entering students, the report shows home counties by level of instruction. Students from individual neighboring states, all other states and foreign countries are also tabulated by level of instruction. County of residence data are presented by sex and for new entering freshmen for each system.

The County of Residence Report includes regular, on-campus students only. For all but the Community College System extension students are not included. The county or state of residence is the place the student resided at the time of application.

Included among professional students are special students enrolled in collegiate units that offer first professional degrees.

Where county of residence was unavailable, students are not included in the tables. This is indicated by a footnote.

The microfiche packet inside the back cover contains County of Residence reports by institution.

PART 5. FALL 1987 NEW ENTERING FRESHMAN RATIOS TO HIGH SCHOOL GRADUATING SENIORS

The New Entering Freshman Participation Ratios to High School Seniors show ratios of new entering freshmen by sex from each Minnesota county. The rate is derived by dividing fall 1987 new entering students from a county by June 1987 high school graduates in that county and multiplying by 100.* The new entering freshmen reported include students who graduated from high school prior to June 1987. Ratios by county have been available since 1973 and provide useful data for trend analysis of post-secondary education participation for each county.

The ratio report displays two figures for each planning region and for the state: a "total" ratio and an "average" ratio. The "total" ratio is the sum of the new entering freshmen from the region (or state) divided by the total high school graduates in that region (or state). The "average" ratio is the sum of the county ratios within the region (or state) divided by the number of county ratios in the region (or state).

Ratios may be slightly different from previous years' reports. Beginning in fall 1984, ratios were cut two places after the decimal point. In previous years, ratios were carried out three places after the decimal and rounded to two places.

Ratios may appear slightly lower than in previous years. Starting in fall 1984, students were not included where their county of residence was unknown.

The microfiche packet inside the back cover contains new entering freshman ratio reports by institution.
